

## **PREFACE**

It is a great occasion, to pay tribute to Prof. R. R Gupta on his 70th birth day, for his research work in the field of the Heterocyclic Chemistry. His dedication to research revolutionizes the heterocyclic chemistry for the betterment of the society. It is our pleasure to start a different type of issue to highlight diversity and novelty of a productive and highly recognized research group. This is none other than Professor Bimal K. Banik's Research Laboratories which have novel and new work with uniqueness, and diversity. He has received Five Million Dollar Research Grants by NIH, NCI and US Kleberg Foundation. It's our pride to publish a special issue using research work conducted at Professor Bimal K. Banik's laboratories in Heterocyclic Letters.
